

Weekly Disease Surveillance Report

2022 Reporting Week 43: October 23 — October 29

This weekly report is produced by the DOH-Okaloosa Epidemiology Section to provide situational awareness to community partners. Data is subject to change as additional information is gathered.

COVID-19 & ILI Trends

COVID-19 and Influenza-like Illness (ILI) both increased in Okaloosa for Week 43. ILI has been increasing since the start of the flu reporting season (Week 40) and continues to remain above the normal trend for this time of year (current level: 10.36%; normal average: 2.5%). We encourage providers to review the weekly [Florida FLU REVIEW](#) for statewide information and please continue to promote vaccination. **Recommended actions based on current COVID-19 Community Level:** Stay up to date with COVID-19 vaccines. Get tested if you have symptoms. People may choose to wear a mask at any time. People with symptoms, a positive test, or exposure to someone with COVID-19 should wear a mask.

MONKEYPOX (MPX)

The CDC urges healthcare providers to be vigilant for patients presenting to your facility with a [characteristic MPX rash](#), which can resemble and coexist with sexually transmitted infections (STIs). It is important to become familiar with [identification](#) and be prepared for [specimen collection](#). MPX testing is available through commercial laboratories. Approval for testing is NOT required from the Department of Health (DOH) if testing through a commercial laboratory.

If UNINSURED patients need MPX testing, please contact DOH-Okaloosa at 850-833-9065 for consultation. The state laboratory will receive specimens for uninsured patients that meet specific criteria and are approved for testing by the DOH. Approval for testing is required from the DOH if testing through the state laboratory and is based on clinical presentation, exposure history, and timeline.

COVID-19 Snapshot

Week 43 Community Level

COVID-19 Community Level	New Hospital Admissions per 100K Population (Past 7 Days)	% Staffed Beds with COVID-19 Patients (Past 7 Days)
LOW	6.1	1.0%

PREVIOUS WEEK COMMUNITY LEVEL: LOW

New COVID-19 Cases Per 100,000 people in the past 7 days	Indicators	Low	Medium	High
Fewer than 200	New COVID-19 admissions per 100,000 population (7-day total)	<10.0	10.0-19.9	≥20.0
	Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)	<10.0%	10.0-14.9%	≥15.0%
200 or more	New COVID-19 admissions per 100,000 population (7-day total)	NA	<10.0	≥10.0
	Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)	NA	<10.0%	≥10.0%

Week 43 Community Transmission Level

COVID-19 Community Risk Level	New Cases per 100K Population per Week	% Positivity per Week
MODERATE	36.5	7.5%

PREVIOUS WEEK RISK LEVEL: MODERATE

Low	<10	<5.0%
Moderate	10-49	5.0 - 7.9%
Substantial	50-99	8.0 - 9.9%
High	>100	>10.0%

Community Level and Community Risk/Transmission Level are the color of the higher risk level for each of the two indicators. Data Source : CDC [Community Indicators at the County Level](#)

Week 43: October 23 - October 29

COVID-19 IN OKALOOSA, CASES vs. VACCINATION

Figure 1: Cumulative number of fully vaccinated Okaloosa residents as compared to COVID-19 cases per week. Data reported through previous Sunday.
Data Source: Merlin & CDC [COVID Data Tracker](#)

Week 43 Review		Difference from Wk42
Resident Case Count	77	+41
Resident Case Count per 100K Population	36.5	+19.4
Average Resident Cases per Day	11.0	+5.9
Percent Positivity	7.5%	+3.3

Data Source: Merlin Database

The Florida Department of Health (FDOH) provides the Centers for Disease Control and Prevention (CDC) with county COVID-19 data, including deaths.

Please visit the [COVID-19 Community Profile Report](#) webpage to obtain death data by downloading the most recent excel file and locating Okaloosa on the 'Counties' tab.

For questions related to COVID-19 death data, please contact the FDOH Office of Communications at 850-245-4111 or NewsMedia@flhealth.gov.

COVID-19 VACCINATIONS		
Fully-Vaccinated Groups	OKALOOSA	US
% of Population ≥ 5 Years of Age	70.3%	72.5%
% of Population ≥ 12 Years of Age	76.1%	76.6%
% of Population ≥ 18 Years of Age	78.8%	78.1%
% of Population ≥ 65 Years of Age	95.0%	93.2%

Influenza-Like Illness

Week 43: October 23 - October 29

Influenza-like Illness (ILI) is defined as fever greater than or equal to 100°F AND cough and/or sore throat in the absence of another known cause.

Figure 2: Annual comparison of the percent of all hospital ED visits due to ILI for Okaloosa county for the 2020-21, 2021-22 and 2022-23 influenza seasons by week. Data source: ESSENCE

ANALYSIS: During Week 43, flu reporting partners and ESSENCE (a syndromic surveillance system) reported an increase in ILI activity for Okaloosa County. The percentage of ILI ED visits in Okaloosa County increased from 6.96% during Week 42 to 10.36% during Week 43. Flu partners reported no positive rapid flu tests this week. Over the past three weeks, 12 out of 15 influenza specimens submitted to the state lab were positive (12 Influenza A unspecified). There were no ILI admissions or deaths reported by flu partners this week. There was 1 outbreak reported. The percentage of total ILI ED visits for Week 43 is higher than that of Week 43 last year.

Note: Other respiratory syndromes can be represented by increased ILI case numbers. Data Source: ESSENCE

% ILI by Age Group Week 43, 2022

Age Range	ILI Visits	Total ED Visits	% Total ILI Visits
0-4	66	251	26.29%
5-19	131	528	24.81%
20-34	39	548	7.12%
35-54	30	581	5.16%
55-74	18	560	3.12%
75+	5	310	1.61%
